

Mahesh Public School, Jodhpur

Class- IV Subject- EVS Worksheet-2

Made By- Ranjana Gupta

Points to remember

- A family tree helps us to understand the relationships between different members of a family.
- People who are related to us through our mother are our maternal relatives and people related to us through our father are paternal relatives.
- A family tree helps us to understand the relationships between different members of a family.
- When your mother was of your age, she lived with a different set of relatives.
- A baby grows inside the mother's body. When the baby grows too big for the mother's body, it is ready to take birth.
- Like human beings, animals also give birth to their young ones. Some animals lay eggs and the young ones hatch out of them.
- Adoption is a process by which people become legal parents of a child who was not born to them.
- Foster parents help in bringing up a child for a few months or years..
- Mother, father and their children living together in a house form an immediate family.
- An extended family includes those members of the family who live in separate homes, another city or country.
- Family gatherings bring feelings of closeness, belonging and respect between family members. They help to form family bonds.
- Our family teaches us good values and discipline.
- Work and responsibilities are shared in a family.
- Decision-making in a family should include all members of the family. This builds a healthy relationship between family members.
